PROFESSIONAL SUMMARY

Full Stack Developer specializing in React.js and Node.js (Express) with experience building scalable web applications and REST APIs. Skilled in SQL database optimization and AI integration using Python, RAG, and LLM technologies to develop intelligent automation systems.

EDUCATION

Ramco Institute of Technology

B.E – Computer Science and Engineering - 7.89 CGPA

2025

SKILLS

Programming Languages: Java, Python, JavaScript

Frontend: React.js, HTML5, CSS3

Backend: Node.js (Express), REST APIs, FastAPI, Flask (Python)

Databases: PostgreSQL, MongoDB, MySQL

AI & Automation: RAG (Retrieval-Augmented Generation), LLM Integration, Prompt Engineering (BMAD), AI Workflow Automation (N8N)

DevOps: Docker (Basic), VPS Deployment, Coolify

Tools: Git, GitHub, Postman, Claude, GitHub Copilot

EXPERIENCE

WisRight Technologies – Chennai

July 2025 – Jan 2026

Full Stack Developer (AI-Integrated Applications)

- Developed responsive frontend modules using **React.js** for enterprise applications.
- Built scalable RESTful APIs using Node.js (Express) and Python (FastAPI/Flask).
- Optimized **PostgreSQL schemas and queries** for high-performance data handling.
- Integrated **RAG-based AI workflows with LLMs** for intelligent automation.
- Deployed **Dockerized applications on VPS environments** ensuring production stability.

PROJECTS

TrueFriend Matrimony (Matrimony Site)

- Developed the complete Admin Panel using React.js and Node.js (Express) for managing user profiles, subscriptions, and moderation workflows for a live matrimony platform with 18K+ active users.
- Designed RESTful APIs and implemented secure JWT-based authentication with role-based access control (RBAC).

- Built advanced filtering, search, sorting, and pagination features using optimized MongoDB queries.
- Improved backend performance through indexing and query optimization for efficient large dataset handling.
- Maintained production features, resolved bugs, and enhanced system stability.
- **Utilized:** MERN Stack (MongoDB, Express.js, React.js, Node.js), REST APIs, JWT Authentication

AI-integrated Learning Management System

- Developed an AI-integrated Learning Management System using React.js, Node.js, and PostgreSQL with dedicated Admin and Learner portals.
- Implemented AI-based content processing where uploaded training materials are converted into structured modules (topics, quizzes, practice, assessments) using Kimi LLM.
- Built a RAG-based knowledge retrieval system by converting training PDFs into embeddings stored in ChromaDB.
- Developed an AI-driven interview assessment module using MS Text-to-Speech for questions and Whisper speech recognition to analyze learner responses and generate feedback.
- **Utilized:** React.js, Node.js (Express), PostgreSQL, Python, RAG, Whisper, MS TTS.

WhatsApp CRM Application

- Architected end-to-end WhatsApp CRM system handling frontend, backend, and AI integration.
- Developed dynamic React.js dashboard for monitoring customer interactions and workflow automation.
- Designed scalable backend APIs using Express and MongoDB for lead tracking and conversation management.
- Implemented AI-driven business workflow using LLM integration with prompt control and structured output validation to reduce response errors.
- Engineered efficient database indexing and filtering logic to improve response time and system scalability.
- Integrated speech-to-text functionality enabling audio-based AI query handling.
- **Utilized:** React.js, Node.js (Express), MongoDB, REST APIs, RAG, LLM Integration, Speech-to-Text.

AWARDS

- **Best Project Award** – Recognized by the **Oracle Team** for developing an Admission Management System using Oracle APEX during college

CERTIFICATION

Build AI-Powered Apps – **CodeWithMosh**
